

## SANIFLO DESCALER & CLEANSER STEP-BY-STEP GUIDE

### Macerators

1. Disconnect the electrical supply to the Saniflo macerator to prevent it from activating
2. Pour 1 litre of the Saniflo descaler into the toilet bowl
3. Flush the toilet **NB: if the toilet/Saniflo is already full of water DON'T flush the toilet or it could cause it to overflow**
4. Leave for a minimum of 2 hours (can be left overnight)
5. Reconnect the power supply to the Saniflo and it should already be at activation level so will activate as normal
6. Flush a 2nd time to clear any remaining residue
7. Repeat this process every 1-2 months in very hard water areas, 3-6 months in soft water areas

### Grey Water Pumps

1. Disconnect the electrical supply to the Saniflo pump to prevent it from activating
2. For grey water products such as Sanishower+ or Sanivite+ mix 1 litre of descaler in a jug with 1 litre of water and pour down the wash basin/sink
3. Leave for a minimum of 2 hours (can be left overnight)
4. Reconnect the power supply to the Saniflo and it should already be at activation level so will activate as normal, If it doesn't activate straight away then run the shower or tap until you hear the unit activates
5. Keep the tap running until you hear the unit operate another 2-3 times and then switch off tap
6. Repeat this process every 1-2 months in very hard water areas, 3-6 months in soft water areas

For safety and warning information please refer to the back of the Saniflo Descaler bottle.
